

STAT107 Data Science Discovery

LAB: GETTING STARTED WITH PANDAS

Man Fung (Heman) Leung

Fall, 2021

University of Illinois at Urbana-Champaign

- Please work in a group of 2–4 students
 - collaboration is important in data science!
 - meet new friends and discuss :)
 - let us know if you have any questions

Random fact of the day

Socrates asked: suppose you are going across a wheat field and want to pick up the best ear of wheat. However, you cannot go back, and you only have one chance. Plato did so, but he came back with nothing after a long time. If Plato knew **statistics**, the result might have changed. (story modified from **here**)

- Main page
- Retrieve the lab using git
 - git bash demo in Windows
- Download the dataset
- Complete the notebook
 - basic data type and conversion
 - row selection
- Submit your work. Feel free to:
 - ask us questions
 - leave whenever you finish the lab
